

 **2022**

8 HOUR

RALLYMASTER INFO:

Paul Tong

(214) 250-1340

rallymaster@heartoftexasrally.com

or

paultong971@gmail.com

The scorers' contact information is:

Red — Jeff Konicek : ldrallyred@gmail.com

(253) 370-9364

Blue — Nancy Oswald : ldrallyblue@gmail.com

(410) 530-7024

The scoring app is mandatory. You must receive special dispensation from the rallymaster to use email to send in bonuses.

If you have a rally question, please call, text, or e-mail the rallymaster. If you need immediate information, please call.

Scoring app can be found in the Apple App Store or the Google Play Store under LD Rally App. If you have a hard time with that, try searching for lonestarlougridersapplications.

RALLY RULES

Safety -

Do not do anything that brings your personal safety or that of another into jeopardy. There are no prizes or official honors bestowed upon any finisher of this rally and it's not worth it to take chances. It is not necessary to exceed the speed limit or to drive at speeds that are excessive for current road or weather conditions. We want you to ride smart and have a good time. Any notice that you are driving recklessly or in a manner that puts this organization or our sport into a bad light may result in disqualification. This is not a race.

Equipment and Gear-

Motorcycle in good working order.

Bike runs, has sufficient tread on tires, no fuel or oil leaks

All lights work

A helmet must be worn at all times (immediate disqualification). Pants, appropriate boots, and gloves must also be worn. We highly recommend and advocate ATGATT (all the gear, all the time).

Auxiliary fuel tanks will match IBR rules standards. Total capacity will not exceed 11.5 gallons and it must be mechanically sound and secure.

Conduct-

Respect the Rallymaster, rally staff, and each other. Do not argue with, complain to, whine over, or be anything but civil and courteous with rally staff. If you have a problem, go see the rallymaster.

If you come upon the scene of an accident, whether it involves one of our riders or not, we expect you to stop and render aid to the best of your ability even if all you can do is call 911 and direct emergency personnel to the scene. Failure to stop is considered a DNF violation. If you must stop and it will cause you to be late or miss a bonus, immediately notify rally staff.

The Book

Riders are responsible for all information and instructions provided. If some requirement is listed somewhere other than where the rider expected it to be, they are still responsible for the requirement. In other words, **READ THE ENTIRE BOOK!**

RALLY RULES

Availability -

Day of the week abbreviations are Su for Sunday, R for Thursday, Sa for Saturday and everything else should be obvious.

Aperture manipulation of cameras to capture ambient light to skirt bonus availability windows will be denied and in some cases may be construed as cheating.

Insurance and License -

You must have current liability insurance as required by your state of registration.

You must have a valid license with motorcycle endorsement in accordance with your home state.

Your registration must be current. Either your motorcycle has a registration sticker with the valid dates or you produce a document showing current registration.

Submission requirements -

For this rally, you must submit bonus photographs via LDRallyApp to rally headquarters. Your device should be able to capture a picture and send this picture from wherever you may be. If you have no data at your bonus location(s) and cannot send your bonus, it is okay to submit your bonuses later when you get in an area with sufficient data connection but do not wait until the very end to submit them all at once.

Flag Requirement -

Your rally flag must be in every picture unless specifically noted.

Your flag is needed for receipt submissions.

Your rider number on the rally flag must be visible and legible.

All pillions must be in EVERY photo unless the instructions specifically state your flag does not have to be in the picture or you are photographing a receipt. If the bonus requires the rider be in the picture, this means that both the rider and the pillion (and your rally flag) must be in the picture.

If the bonus requires your motorcycle in the picture, the picture must show your ENTIRE motorcycle.

If you lose your rally flag, contact the rallymaster. From that point on, your face (and your pillion if applicable), must be in every picture. The penalty for losing your flag is half your final points.

Do not stop in the roadway to take a picture. The intent of the sample photo is for you to replicate the sample photo. Do not take your submission photograph from further away, around the corner, etc. If you do, you risk the bonus being denied and your argument is invalid. If you have to stop a slight distance from the bonus and walk to it, then do so. Anyone violating the 'do not stop in the roadway' rule will be declared DNF.

REGISTRATION / WAIVER

- **For the rally, we will need several items prior to the start for registration purposes. Below you will find a link to two on-line forms, the first of which will allow you to enter your contact information, drivers license information, vehicle registration and insurance information, and emergency contact information. The second is the AMA waiver. These need to be completed prior to the rally start.**
- **DO NOT FORGET TO DO THIS or you will have to do it the morning of the start and this will take time away from your rally. You are not an official entrant in this rally unless we receive the completed electronic form and the AMA Waiver.**
- **For rider & pillion, only one registration form needs to be completed BUT each person needs to complete their own separate AMA Waiver.**

<https://hotrally.link/RegistrationHOT22>

<https://hotrally.link/AMAWaiver>

***Note: The registration form includes a space for a Spotwalla link. Spotwalla is NOT required for 8 hour riders although we do encourage you to provide one if you can. This allows us to keep track of you and to be able to assist you in an emergency. Again, there are no points for the 8 hour riders and it is not required, but you can participate if you want.

HEART OF TEXAS RALLY

Welcome to the 2022 Heart of Texas Rally : Days of Thunder

The movie starring Tom Cruise, Robert Duvall, and Nicole Kidman has long been a favorite of mine. I never was a huge NASCAR fan but I loved watching people build cars and find all the ingenious ways to make these cars stronger and faster. There's a lot of rich history in regards to America's racetracks and they shaped the culture of many communities around the country.

The theme of this year's rally is race tracks in Texas. From big venues such as the Texas Motor Speedway or the Circuit of the Americas to small mom-and-pop motocross tracks and RC car tracks, you will find all types of venues used for motor vehicle and motorcycle racing. Some are new, some are old, and some have been long shutdown and the signs you will seek may be hidden in overgrown weeds.

All that being said, THIS is not a race and the Texas roadways are not a racetrack. This rally is a combination of puzzle solving, endurance riding, time management skills, and efficiency of stops. You may start where you like and we designed it so that there really is not a best starting location. You start wherever is convenient for you.

Okay, riders! **START YOUR ENGINES!!**

GENERAL INFORMATION

8 Hour Rally

April 30, 2022 0700 (Central)

- Riders meet at PJ's Café in Irving at 2301 N O'Connor Rd in Irving, TX. We will buy you breakfast before the start. You don't have to be there at 0700, but please arrive no later than 0800 for pre-ride riders' meeting.

0830 (Central)

- Riders are released to start rally

1630 (Central)

- Riders must arrive by 1630 or they are DNF. There is no penalty period.

1845 (Central)

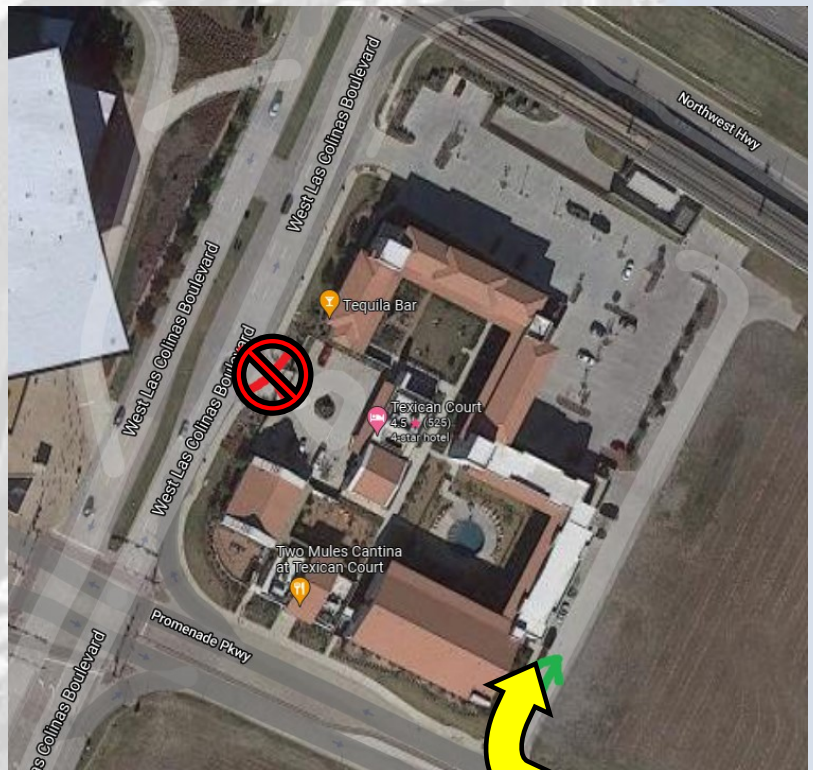

- Banquet room open for seating. Cash bar available (no outside alcohol)

1915 (Central)

- Dinner served, awards banquet

GENERAL INFORMATION

- Since we are all starting together from PJ's Café, there is no need for a start receipt. We will record your starting odometer before you are released.
- Sequence number is very important. Sequence number in the scoring app is the same as the bonus sequence number on your bonus claim form. For example, the first bonus, START, will be sequence #1. The next bonus, your second bonus, will be sequence #2. Your sequence number should always coincide with the number on the bonus claim form. It is YOUR responsibility to make sure you submit the correct sequence number and that it matches your bonus claim form (back of this book).
- There is a triathlon in the area of the hotel finish on Sat April 30. The Texican Court main entrance is located on W. Las Colinas Blvd but this may be partially blocked. There is another entrance off Promenade. You should enter there and look for the rally volunteer to record your stop time and ending mileage. Come in on Promenade from Riverside Dr.

PREMISE OF SCORING

To win this rally, you must attain the highest number of points gained from successfully submitting the bonuses listed in this rallybook. There are two types of bonuses:

Racetrack Bonuses

Pitstop Bonuses

There are numerous RACETRACK bonuses. All are denoted by three letters and two numbers LLL## (i.e. SWG14). If there is something in the first 3 characters that looks like the number one or zero, they'll probably be the letters 'i' or 'o'. There are raceways, racetracks, motocross tracks, RC car tracks, dragways, speedways and more. All of them fall under the category RACETRACK.

There are numerous PITSTOP bonuses. All PITSTOP bonuses start with 'PIT'. These are all old gas stations from 50-100 years ago with notable names such as Sinclair, Texaco, Humble Oil, and Mobil. Some are immaculately maintained for visitors and some are crumbling heaps that are one tossed cigarette away from becoming ash heaps.

We will be using the LD Rally App for submitting bonuses. It is mandatory. If anyone has any issues, contact the rallymaster.

On the next page, we'll discuss how the points work.

PREMISE OF SCORING

As with any motor vehicle competition, a great start location is important but if you start with an empty fuel tank, you could have the pole position and you still are not going anywhere. Throughout these events, even in the best NASCAR or Formula 1 races, the vehicles must be refueled. Without fuel, you won't advance.

You will gain points from the RACETRACK bonuses. The PITSTOP bonuses will not gain you points but you cannot gain RACETRACK points without them.

Each PITSTOP bonus is worth its listed amount in fuel credits. You cannot gain RACETRACK points unless you have fuel, so the first bonus you will claim (after submitting your start receipt) will need to be a PITSTOP bonus.

Once you claim a PITSTOP bonus, you will have that many fuel credits and then can start seeking out RACETRACK bonuses. You can only get as many RACETRACK points as you have fuel credits. If you claim a bonus which is worth more points than the amount of fuel credits you have, you'll only get the number of points left in your fuel credit bank.

You can bank fuel credits. If you have fuel credits left after you claim a RACETRACK bonus and then you claim another PITSTOP bonus, you'll get your leftover fuel credits plus the new PITSTOP fuel credits. You are allowed to claim several PITSTOP bonuses in a row to build up your fuel credit bank so that you can seek larger point RACETRACK bonuses.

As you can tell, getting the bonuses in the right order is VERY important, so you must make sure the sequence number you enter in the scoring app is the same as on your bonus claim form. Entering the correct sequence number is just as important as having the correct bonus code and picture.

Remember that your first bonus you claim will have to be a PITSTOP bonus.

PREMISE OF SCORING

Sequence	Bonus Code	Value	Available Fuel Credits to Start	Points Awarded	Fuel Credits Total
1	PITA4	638 (fuel)	0	0	638
2	DWD01	210	638	210	428
3	RWS20	214	428	214	214
4	RWA02	210	214	210	4
5	PITD1	296 (fuel)	4	0	300
6	PITD2	296 (fuel)	300	0	596
7	SWF13	681	596	596	0
8	KTR03	186	0	0	0

See the bonus list above. We start with our first bonus (sequence 1) and claim PITA4 (all PITSTOP bonuses start with PIT) and we gain 638 fuel credits.

So when we go to the next bonus (sequence 2), we have 638 fuel credits for a bonus worth 210 points. Therefore, we get all 210 points AND have 428 fuel credits left.

Starting sequence 3, our third bonus, we have 428 fuel credits. Since the point value is 214, we get all of that and still have 214 left. Sequence 4 we have 214 fuel credits allowing us to have the full 210 points and 4 fuel credits left over when we claim two more PITSTOP bonuses on sequence 5 and 6. We get 296 for each PITSTOP for 592 credits PLUS the 4 left over and now have 596 fuel credits when we got to the seventh bonus.

Now, as you can see on the seventh bonus, we have 596 available fuel credits BUT the bonus is worth 681 points. Since we only have 596 fuel credits, we only get 596 points and lose the other 85 points. AND when we go to bonus #8, there are no more fuel credits left so we get zero points for that bonus.

So, we have a total of 1230 points when done. If we had more fuel credits, we could have scored 1501 points but some bonuses may still be worth claiming a bonus even if you only get partial points.

PREMISE OF SCORING

For the 8 hour rally, you have the same bonuses and point values as the 36 hour rally, but they have more bonuses which are not listed in this book. You can only claim the bonuses LISTED IN THIS BOOK.

The 36 hour rally includes bonuses all over Texas. Because you only have 8 hours, we limited the area of bonus collection for what you can reasonably obtain in the time allotted.

When you are using the scoring app, you'll see other bonuses not listed here in this book. You cannot claim anything not listed in this book. Be sure to double check the bonus code you choose before you submit.

INTERPRET THE BONUS

BONUS CODE

The bonus code is the primary identifier you will use for all your bonuses and is what you will select to claim a specific bonus in the scoring app.

ATW01

Heart O' Texas Coliseum
4601 Bosque Blvd

Waco
31.537640

Availability
anytime

PHOTO AVAILABILITY

This is the time or time range for which you can take the picture.

POINT VALUE

This designates how many points the bonus is worth. In this rally, racetrack bonuses are worth points. In the PITSTOP bonuses, this number represents the number of fuel credits that bonus is worth.

711

Take a photograph of the marker produced by the Texas State Technical College on the corner of the coliseum.

Actual name of location

Street Address

City

GPS coordinates (latitude, longitude)

REFERENCE PHOTO

You should attempt to replicate this reference photo as close as possible unless the photo requirement gives you alternate options.

BONUS LOCATION REFERENCE

The yellow concentric circles mark the location where the bonus is located or at least the general area.

Spotwalla is a tool we heavily rely on for keeping tabs on riders during our events. It is primarily so we can immediately identify if you are having an issue or emergency. **THIS IS NOT A BONUS FOR 8 HOUR RALLY RIDERS AND IS NOT MANDATORY BUT WE ENCOURAGE YOU TO PARTICIPATE IF YOU DESIRE.**

You do not have to use the traditional SPOT device. There are several other supported devices and information about these can be found at <https://new.spotwalla.com/help/devices>.

If you choose to participate, complete the two tasks below:

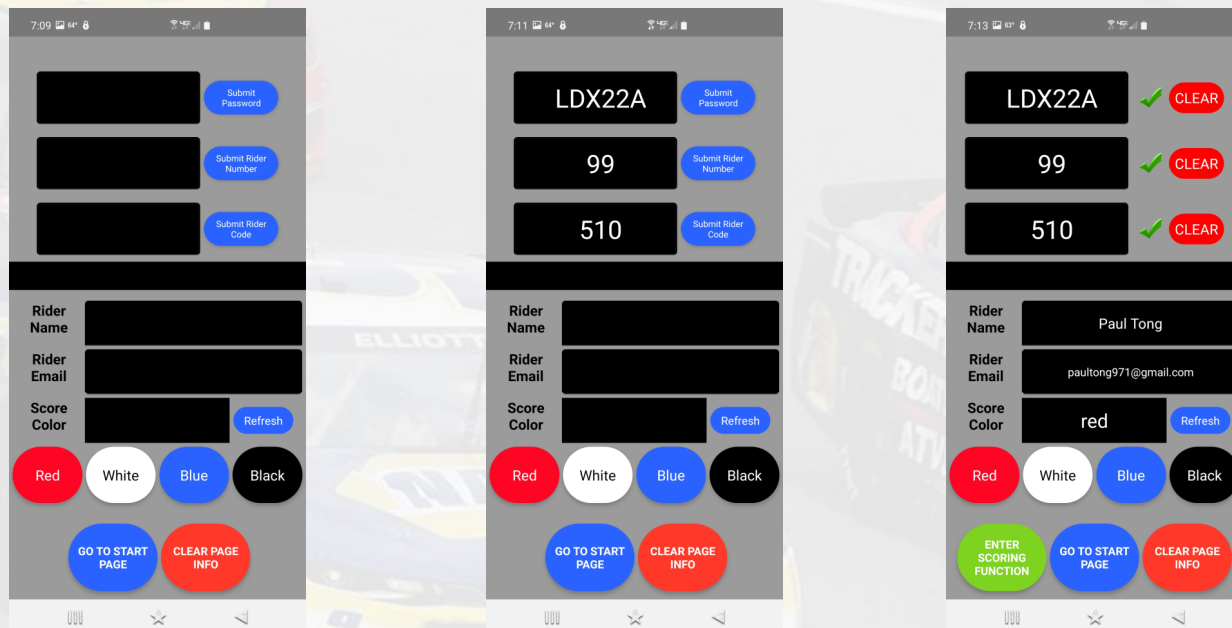

To Create a Trip Link in Spotwalla:

1. Log in to Spotwalla
2. 'Your Dashboard' should come up. On the left side, look for 'Trips' and the button 'Trip Manager'. Select 'Trip Manager'.
3. All your trips, if you have any, are listed here. Select 'Create Trip'.
4. Give your trip a name and a description. It really doesn't matter to me what you choose. The start date will be April 29, 2022 at 00:00 and the end date will be April 30, 2022 at 23:59. Choose the device you will be using. Then click 'Create'.
5. Your new trip will show on the 'Trip Manager' page. Find that trip and click on the arrow next to the name and a drop-down menu will appear. Click 'Links'.
6. There will be a link at the top of the page and a similar one at the bottom. The top one will be sufficient.
7. You'll enter this link in the registration form you saw listed on page 3 of this book.

To Join the 2022 Heart of Texas Rally Public Page:

1. Go back to the dashboard. Look for the 'Location Pages' across the top and click on that button.
2. You will see Heart of Texas Rally listed. On the far right is a link for 'Join this Page'. Click that.
3. The join password is DaysOfThunder.
4. Select the device you'll be using for the rally. It has a drop-down list with your devices listed.
5. For location ID, just put your initials. I'll change it later.
6. Click 'Join'.

SCORING APP

- When you first enter the app, you click on the blue 'Rider Information Screen Button'. This will bring you to the page you see above. Chances are there may be default information in the blanks. Just click the red 'Clear Page Info' button.
- Your event password, rider number, and rider code is on a sticker on the inside cover of your rallybook. Enter the event password and hit the blue button to the right. You should get a green check mark. Then type in your rider number, click blue button, then enter rider code and blue button. Once all three are verified, your name, email, and score color should be populated. Sometimes your information won't populate right away, so just hit the blue "Refresh" button, and all the information should be there. Do not press any of the scorer color buttons. Your score color is already assigned and you must not change it.
- Once everything is in place, the green 'Enter Scoring Function' button should appear. Go there. You will not need to come back to the Rider Information page for the rest of the rally.
- Since you are getting this book ahead of time, you can play with the scoring system as much as you want BUT come rally start, you'll want to clear all information and bonuses from the system. Below is a link to a tutorial for the scoring app.

• [***https://hotrally.link/LDRallyAppTutorial***](https://hotrally.link/LDRallyAppTutorial)

SCORING APP

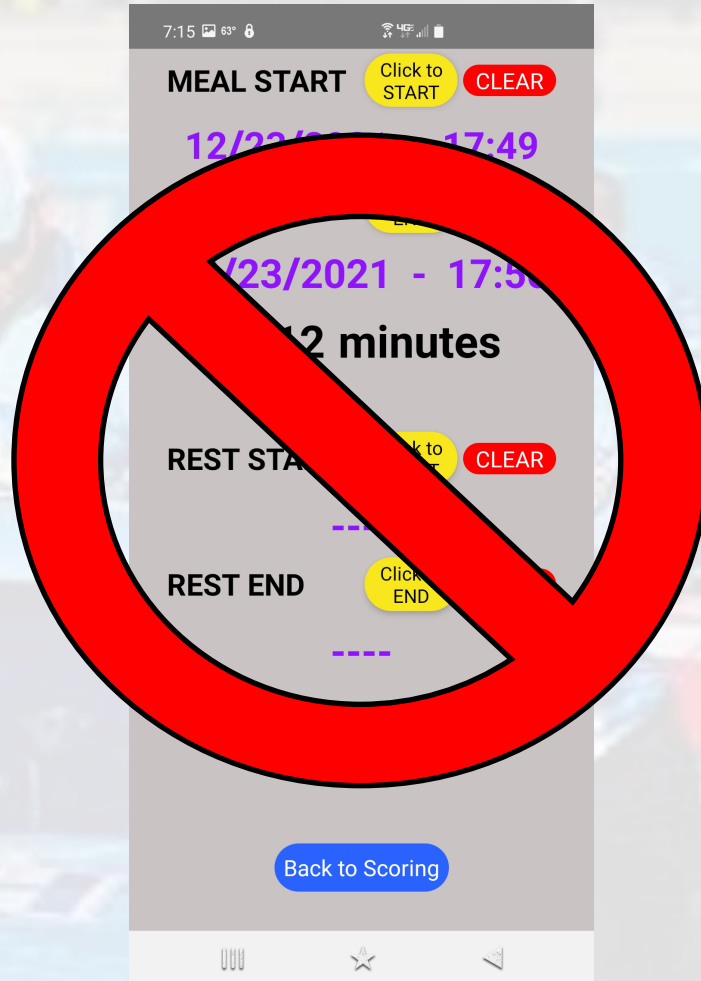

The screenshot shows the Scoring App interface. At the top, there's a status bar with the time 7:13, battery level 63%, and signal strength. Below that, a header section displays the Rider # (99), Prev Bonus (REG5), and Prev Seq# (4). The main area shows a list of bonuses with columns for Sequence #, Bonus Code, and Availability. The bottom section contains buttons for 'Pick Bonus', 'Take Camera Picture', 'Retrieve Photo Gallery', 'Submit Bonus', 'Go to Start Screen', 'Go To Claimed List', and 'Meal / Rest'.

Sequence #	Bonus Code	Availability
5	XEAT1	

- There are three important parts of sending a bonus: the picture, the bonus code, and the sequence number.
- When you first open the scoring screen, for the very first bonus, change the sequence number to "1". You can either type it in manually or just hit the '+' button. As you submit bonuses, the sequence number will automatically increase by one for each bonus.
- I suggest you take the bonus picture with your phone's normal camera function rather than from within the app. This way the pictures will be saved to your galley. Then you can just 'Retrieve Photo Gallery' to select the photo you want to use. You can use the 'Take Camera Picture' in the app, but it might not save to your gallery and means you won't have a copy for later. The app is designed for horizontal pictures (hold your phone sideways) but you can do vertical, it just won't maximize in the window as well.

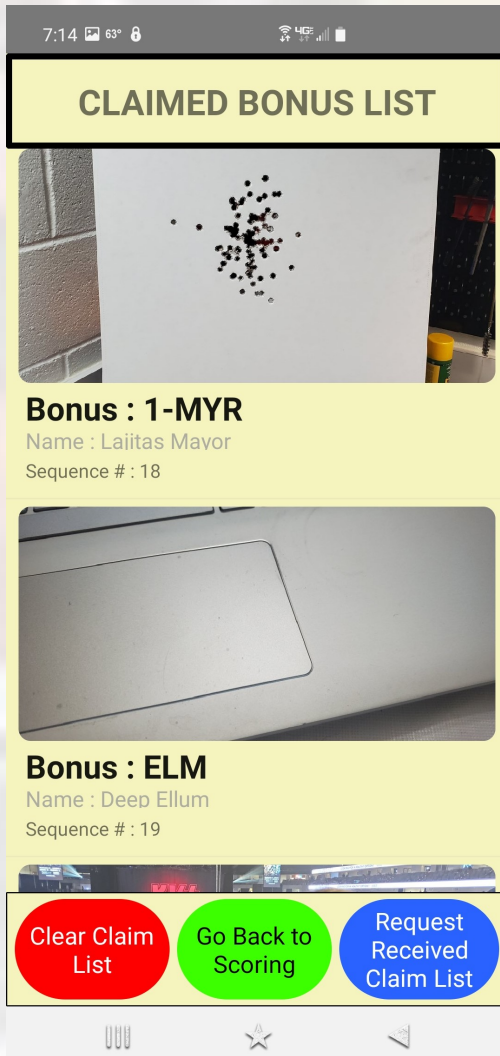

- You can manually enter the bonus code, but we recommend you hit the 'Pick Bonus' button and scroll through the list to select your bonus. The scroll list allows you to see the bonus reference picture, the bonus code, and the availability. You then select you want to use that bonus and go from there.
- Once you've ensured the sequence number is correct, the bonus code is correct, and the picture is correct, you can hit the 'Submit Bonus' button. If you have an error, it should tell you. If you have no data, it will not send and all the information (picture, bonus code, sequence number) will stay in place until you reach an area with data and then you can try again. If the submit button says 'Successfully Submitted', then you know the scoring system received the information.
- In the top of the screen, you'll see the last bonus you took. Once you successfully submit a bonus, you'll see it appear at the top of the screen and you'll be ready for your next bonus.

SCORING APP

- The MEAL/REST button is only for the 36 hour riders who get credit for meal breaks and a rest break. You will not be using this in the 8 hour rally, so you can just ignore it and not use that button. (You'll see the button at the bottom of the Scoring Function page)

SCORING APP

The CLAIMED BONUS LIST will show your bonuses in the order you submit them. Each one should show you the picture you sent, the bonus code selected, and the sequence number. If you do it right, the first sequence number should be “1”.

In the bottom right is a ‘Request Received Claim List’ button. If you hit this button, it will send an email to your scorer requesting to send you a list of the bonuses we’ve received up to that point. You should receive an email from your scorer with a PDF attached of your bonus list. It will not tell you if it was approved or denied, it’s just a list of what we’ve received. This way you can check and make sure everything is in order and there are no gaps. Do not click this after every bonus submission. If it’s in your claimed list, we received it but if once a day you want to verify, go ahead.

The “Clear Claim List” will clear the list. If you accidentally hit it, it will ask you if you’re sure, but still be careful. If you accidentally clear you list, it’s okay. We still have your bonuses and it won’t hurt your rally. If your phone is bogging down because of a lot of bonuses shown in your claim list, you might want to clear the list because each picture is a large file and takes up a bunch of space.

You will HAVE TO clear the claim list prior to starting the rally. We may try to remind you but it is your responsibility. Always remember to start with sequence 1.

SCORING APP

- The scoring app is mandatory BUT.....sometimes things just won't work and we don't know why. If so, you can send an email to your scorer with the picture and the following information in the subject line. Notify the rallymaster first.
- You will enter in the subject line:

Rider Number	Bonus Code	Sequence Number
23	ACL12	4

- The purpose of the scoring app is to streamline the scoring system, remove rider and scorer data entry errors, and make your final scoring process as smooth as possible.
- At the finish of the rally, you will report to scoring. Once called, you will receive a list of the bonuses received and a list of any bonuses that were denied and why. The tabulated score should match what you have. If so, you sign the report and hand it back to a designated staff member. If there is an error, we'll sit you down with a scorer and work it out.
- You will receive a bonus claim form (back of this book). **YOU MUST CORRECTLY FILL OUT THE CLAIM FORM.** The best way to ensure you are correctly using the app is to make sure your sequence numbers in the app match the sequence number on your claim form. You must bring the claim form to scoring IF you want to contest any errors. If you do not fill out the claim form, you may not contest any errors on your scoring report regardless of any other evidence you present.

BONUS LISTING

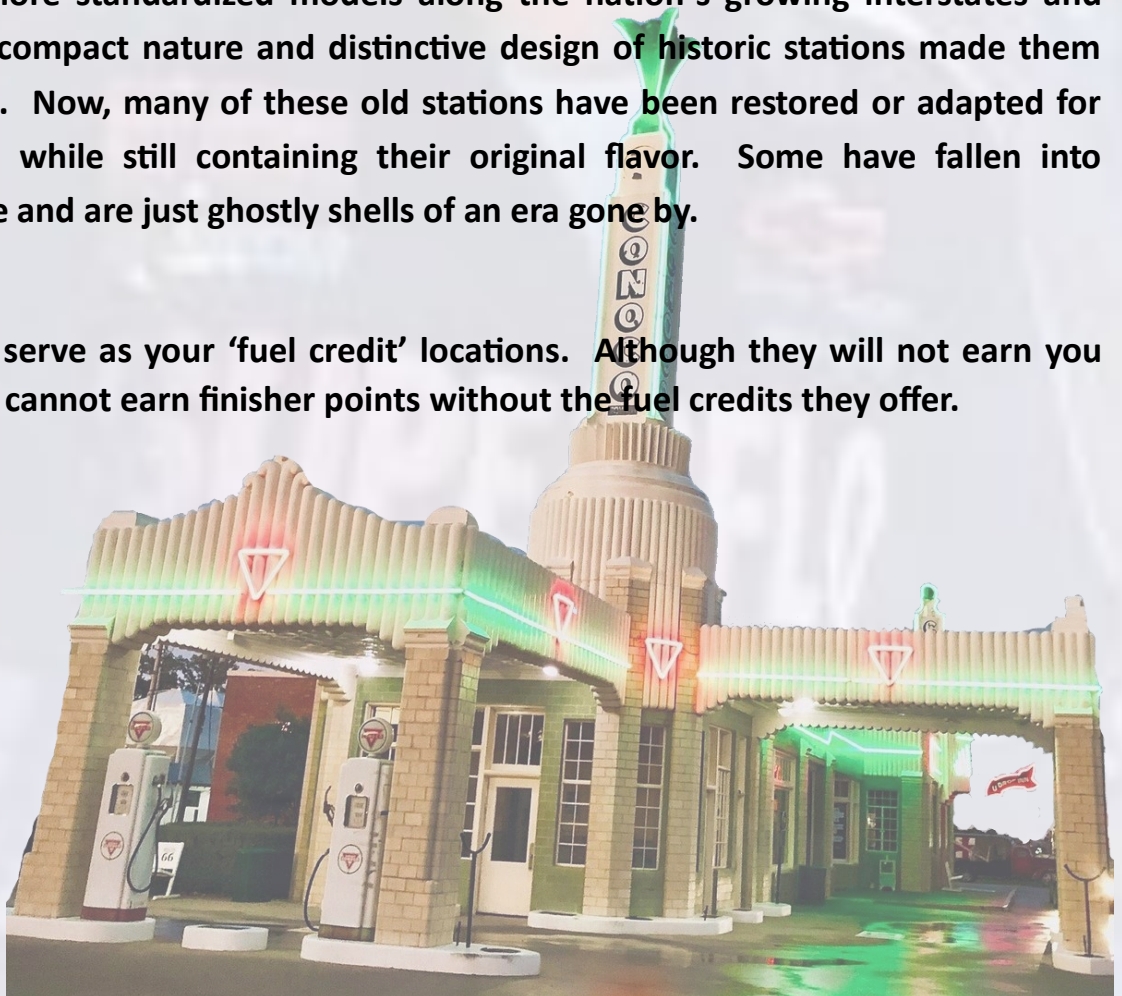

PITSTOP BONUSES

In the early twentieth century, as motorists hit the road in steadily increasing numbers, oil companies captured customers with catchy slogans, giveaways, attention-grabbing signs, and gas stations designed to encourage brand association. The well-considered designs made these structures attractive and adaptable for new uses. As early as 1913, architect-designed stations began dotting the landscape. Influenced by the turn-of-the-century City Beautiful movement, oil companies adopted historic architectural styles to make stations resemble classical temples, colonial houses, and more exotic building types.

Historic gas stations lost their functions in great numbers as oil companies updated their brands and built more standardized models along the nation's growing interstates and highways. But the compact nature and distinctive design of historic stations made them attractive for reuse. Now, many of these old stations have been restored or adapted for alternate purposes while still containing their original flavor. Some have fallen into disrepair and disuse and are just ghostly shells of an era gone by.

These stations will serve as your 'fuel credit' locations. Although they will not earn you finisher points, you cannot earn finisher points without the fuel credits they offer.

This old Conoco station in Shamrock, TX was the inspiration for Ramone's House of Body Art from the 2006 Disney movie *Cars*

BONUS LISTING

RACETRACK AND OTHER BONUSES

As long as mankind has existed, racing has existed. No doubt Cain and Abel, prior to the fateful day of Abel's demise, would race each other as kids will do. When man discovered horseback riding, it probably didn't take long for them to discover horse racing. The Greeks started the Olympics which had races and the Romans had chariot races. We race everything from our own two feet, to bicycles, to boats and even airplanes. So it only made sense once the internal combustion engine was created, that man would seek to race these machines as well.

Stock car racing in the United States has its origins in bootlegging during Prohibition, when drivers ran bootleg whiskey made primarily in the Appalachian region of the United States. Bootleggers needed to distribute their illicit products, and they typically used small, fast vehicles to better evade the police. Many of the drivers would modify their cars for speed and handling, as well as increased cargo capacity. The repeal of Prohibition in 1933 dried up some of their business, but drivers continued "runnin' shine", this time evading the "revenueurs" who were attempting to tax their operations. The cars continued to improve, and by the late 1940s, races featuring these cars were being run for pride and profit. These races were popular entertainment in the rural Southern United States.

Racing has developed into many things and comes in many forms. From Formula 1 Racing to NASCAR, to Supercross, and even radio-controlled cars and airplanes, these racing methods quickly found a place in Texas and any populated area with sufficient population was sure to find at least a rudimentary straight track and dirt oval. Texas had hundreds of tracks including international venue racetracks all the way down to some old farmer with a crude dirt track in his back pasture. Time, advancement of technology, ****politically motivated rant removed****, and now recently COVID, has brought about an end to many of the small, local tracks where racing on a Saturday might be the only thing going on in town. Even large venues have trouble keeping their doors open.

So before they're all gone and hidden from view by wild undergrowth or urban expansion, let's visit some of these racetracks and celebrate the ones still here and remember those that shone ever so bright, if just briefly.

BONUS CLAIM FORM

Upon arrival at the finish, you will meet with a rally volunteer in the back parking lot where they will record your finish odometer and then direct you to scoring. Bring this completed claim form to scoring. There, you will receive a print-out of all the bonuses you claimed. If everything matches, sign and return your score report. If there is an issue, request to speak to a scorer.
